- (ii) US\$261.7 million (40.4%) decrease in sales of imported products.
- (iii) Increase in E&P sales for US\$ 1.6 million due to higher prices of Henry Hub and lower prices of ICE Brent.

Sales breakdown

Cost of Goods Sold & Other Operational Expenses

COGS

- Cost of goods sold decreased in US\$142.7 million (-5.5%) YoY mainly due to lower crude oil costs and lower volumes of imported products:

 - Operational non-crude costs increased in US\$13.4 million, due to higher fixed and variable costs.
 - E&P production costs increased in US\$12.3 million mainly driven by higher royalty costs in Argentina, and higher maintenance costs in Ecuador, workover in Egypt and higher operation and maintenance costs in Magallanes.
 - Imported gas related costs increased in US\$27.9 million, mainly due to higher marker prices.

Other Operational Expenses

Exploration & Production

Financial Highlights

- EBITDA from Magallanes (Chile) decreased US\$7 million, mainly due to lower production volume and prices, along with an increase in production costs.
- Argentina's EBITDA decreased US\$1 million YoY, mainly due to lower crude oil price that was partially offset by a higher gas price during the quarter, that made increase revenues but together with higher costs, that reduced the final result.
- In Ecuador, EBITDA decreased US\$3 million and in Egypt, EBITDA decreased US\$1 million in both cases, mainly due lower production volume and higher production costs.

Operational Highlights

- E&P average production of 60.5 kboe/day for Q1'23, a 3% lower compared to 62.3 kboe/day in Q1'22.
- Our reserves are distributed mainly in Chile, Ecuador and Argentina.
