

ENAP

Patricio Farfán Bórquez

REFINERIES CORPORATE MANAGEMENT

He holds a degree in Chemical Civil Engineering from Universidad Técnica Federico Santa María, and an MBA from Universidad Adolfo Ibáñez. He joined ENAP in January 1999 as Aconcagua Refinery Storage and Terminals. In his 22 years with the company, he held the positions of Production Optimization Engineer, Shift Processes Engineer, Programming Engineer, Head of the Catalytic Cracking Division and Head of the Operations Department. As Head of the Operations Department, position he assumed in November 2012, he led the productive processes of Catalytic Cracking, Isomerization, Alkylation, Sulphur Plants, Amine Treatment and Diisopropyl Ether (DIPE), as well as the Storage and Terminals of both, the refinery and Quintero Maritime Terminal. In August 2013 he was appointed Manager of Aconcagua Refinery, and in February 2018 he did the same as manager of ENAP's Refineries. Since January 2021 he has been the Refinery Operations Manager of ENAP.
